

## Practical 15

Write a shell script to find and display the largest file in the current directory.

Concepts used: ls , sort , head , pipes ( | )

```
student@student-virtual-machine:~/Downloads$ ls -l
total 3300
-rw-r--r-- 1 student student 145 Nov 27 12:05 image_proc.py
-rw-r--r-- 1 student student 1200 Nov 27 3:28 find_max.sh
-rw-r--r-- 1 student student 78 Sep 6 10:05 logs_archive.tgz
-rw-r--r-- 1 student student 55432 Sep 6 10:05 README.md
student@student-virtual-machine:~/Downloads$ nano find_max.sh
student@student-virtual-machine:~/Downloads$ bash find_max.sh
The largest file is:
-rw-r--r-- 1 student student
-rw-r--r-- 1 student student 55432 Sep 6 10:05 logs_archive.tgz
```

```
GNU nano 6.2 find_max.sh
#!/bin/bash
# Script to find the largest file in the current directory.
# Uses ls, sort, head, and pipes.

echo "The largest file is:"
# ls -l lists, sort -nr -k5 sorts numerically reverse by size, head -n 1 takes top line.
ls -l | sort -k5,5rn | head -1
```
